

Cookie Policy

Hardy London Limited uses cookies to personalise and improve your site experience.

1. What is a cookie?

Cookies are small files which are stored on a user's computer or mobile device when visiting a website. This allows the server to deliver a certain page tailored to a particular user.

Cookies perform essential functions such as letting you navigate between pages efficiently, remembering your preferences and generally improving your browsing experience.

2. Types of cookies

There are two types of cookies which may be placed onto your device during a website visit.

Session cookies are at the start of a visit and remain active only while that visit continues. They primarily support navigation through the site as they remember which pages you have been on and what interactions you may have had with the site already.

Persistent cookies are set during a first visit to a site but will carry an expiry date or time. This cookie will remain on your device until either you clear your cookies or the expiry is reached.

Neither of these types of cookies are used to collect or share personal information.
